Apartments in the Centre of Kyrenia – A Rare Opportunity Directly from the Developer

Buying an apartment in the centre of Kyrenia is an opportunity to own property in one of the most desirable locations in North Cyprus.

Almost all available land for new development in the city centre has already been used, making new residential projects in this location increasingly rare.

The development enjoys a carefully selected location, close to the sea, supermarkets, schools, five-star hotels, restaurants and all essential city amenities.

The building's contemporary architecture, excellent location and limited availability of new developments in central Kyrenia make these apartments an attractive choice both for permanent living and investment.
