Mediterranean Design Villas in an Ideal Location

s-als-122

Описание:

The location for the villa of typical Mediterranean design has been carefully chosen -

the mountain of "five fingers" in the north, and in the west the Mediterranean and the sun, the sunset to which there is no similar view!

A typical Mediterranean complex of villas, due to its physical characteristics, has become a prerequisite in this place for a beautiful design that fits perfectly into this corner of nature. The rustic spirit brought by the forest is mixed with modern "minimalism", as if to put an end to the chaotic life in a finely crafted project.

While subtle geometric shapes are transformed into

a symbol of modernism with simple and sharp edges, the stone and white walls reflect the Mediterranean.

This figurative concept has a functional interior design that runs through the exterior spaces.

A design that adapts physical features and nature makes this project special and a step above the rest.

The villa is located 1 km from Alsancak, next to the village of Injesu and the forest.

Offering a quiet and peaceful life away from the crowds, in the countryside nearby

to the forest, the villa has easy access to the city and the surrounding area, which makes its location the most advantageous.

Direct access to the common areas from each house, to the communal pool and terrace.

for sunbathing, shared toilets, showers and a cafe/pool bar overlooking the

mountains and sea views are the poetry of movement.

1st grade quality materials used in homes, central heating and cooling,

built-in shower systems, stainless steel siphons, ceramic shower enclosure

showers, wall-hung toilets, flush-mounted cisterns that have become

ard materials used by the company that are not used by many companies,

offered to buyers.

The project has 20 duplexes 3 + 1 with an area of 175 and

12 villas 2+1, duplex row houses 110 sqm
